

Welcome to Creative Building Supply

Creative Building Supply is a premier regional resource for the widest array of finished metal building components, including but not limited to pre-shaped roofing and siding panels, opaque & translucent fiberglass re-inforced plastic panels, and asbestos free cement sheets.

Forming custom panels in stainless, aluminum, galvalume, galvanized both in painted and un-painted. Perforated panels also our speciality. Profiles include 1 1/4" Corrugated, 2 1/2" Corrugated, 4.2 corrugated, 7.2-Rib, 4 7/8" V-Beam, 5.33" V-beam, 5.33" Box-Beam, 7"-Rib and many more roofing & siding panels to meet your application. We can duplicate almost any profile required. Maximum panel length Varies with profile and quantity.

Our team enjoys a well established reputation in custom fabrication of most metal and fiberglass re-inforced plastic building products. Augmenting this ability by maintaining a vast inventory of quality industrial building materials and accessories produced by nationally known manufacturers. CBS serves as a single-source responsibility for supplying what you want - where you want it - when you want it.

Not finding quite what you need in our on-site inventory? The experienced staff at Creative Building Supply specializes in applying our state-of-the-art manufacturing facility towards meeting your custom structural and aesthetic specifications. In serving the commercial, industrial, and agricultural market along with residential, we take pride in having the expertise to achieve complete customer satisfaction through highly customized metal fabrication services in a wide variety of often rare substrates, colors, shapes and finishes.

We specialize in custom metal forming, sheet metal fabrication, flattened & expanded metal, perforated and corrugated metal, C.F.P. mansard panels, custom and precision trim panel profiles and flashings, as well as hard to find metal manufacturing.
